

# Announcing a New Association Member Service

To: All Northeast Dairy Foods Assoc., Inc. Members  
Date: May 1, 2011  
From: Bruce W. Krupke, Executive Vice President

Dear Northeast Dairy Foods Assoc., Inc. Member,

I have a new partnership association member benefit service for your review. I would like to introduce to you Energy Partner Consultants, (EPC) which is a full service, national energy-consulting group that specializes in understanding specific energy markets and applying this knowledge to help you our members positively change their energy consumption practices and lower their energy overhead costs. This program is available to you as a member only program. After careful evaluation I believe EPC is a quality company that can provide you with a service that can save you money.

Through our Affinity Partnership between Energy Partner Consultants and Northeast Dairy Foods Assoc., Inc., we are offering all members a free energy audit, which will allow you to lower your electric and natural gas supply costs anywhere from 5% to 20% (and in some cases **even more!**). This is done with no financial commitment what so ever. It doesn't matter if you are a large manufacturing location or one with just offices and coolers, EPC will be happy to provide you with consultation.

In addition to helping you immediately lower your energy supply costs, EPC's experienced and professional staff will conduct a free energy reduction assessment to determine if your business qualifies for a variety of credits and incentives being offered by local utilities and state and regional regulatory agencies. These types of programs are emerging at a fast rate and you should be aware of what is available and take advantage them!

Their method is to thoroughly analyze clients' needs and requirements, educate, counsel and help them make valued decisions that will promote their economic viability as well as the best energy interests of our ever-changing society. Combining these dual objectives is not only possible at this time in history but also strategically and fiscally advantageous.

## **EPC Core Consultative Services Are:**

Electric and Natural Gas Supply Procurement  
Demand/Load Response Program Participation  
They also offer free consultation on:  
Co-generation and Waste Heat Recovery  
Alternative "Green" Energy Sourcing (Solar, Wind, Geothermal...)  
Energy Efficient Lighting/LEDs  
Government and ISO Incentives  
RECs  
NYPA Power for Jobs Enrollment

To get started, all you need to do is submit a copy of a recent utility bill confidentially to the Northeast Dairy Foods Assoc., office or to EPC directly and they'll get started on your analysis. They will be happy to meet with you at anytime to review their service.

Northeast Dairy Foods Association, Inc. looks forward to working with EPC and members to supply you with the most efficient, quality, low cost energy alternatives available. Please feel free to contact Robert Wright or myself directly if you have questions or would like to set up an appointment to discuss your energy needs. We look forward to helping you lower your energy overhead costs!

Thank you,

Bruce W. Krupke  
Executive Vice President
